

# Executive Summary

**Strategic Recommendation:** Roll out the new chips layout across similar benchmark store profiles. The 12-week trial across Stores 77, 86, and 88 generated a statistically significant revenue lift (up to +15.1%), driven primarily by increased customer footfall.

## 01 | Chips Category Review

### Christmas Sales Peak & Holiday Closure

Sales climb steadily in December, peaking right before Christmas Day. Zero sales on Dec 25 reflect store closures, followed by immediate recovery on New Year's Eve.

### Core Revenue Drivers (Task 1 Alignment)

**Mainstream - Young Singles/Couples** contribute most to overall sales volume, while **Older & Younger Families** record the highest average spend per transaction.

### Product Preferences

High preference for mid-to-large pack sizes (160g–175g), with **Kettle** and **Smiths** dominating impulse purchases across key demographic segments.

## 02 | Trial Store Performance

### Control Store Matching Methodology

Control stores (233, 155, 237) were paired with Trial stores (77, 86, 88) using Pearson Correlation & Magnitude Distance across pre-trial monthly sales and customer counts.

### Statistically Significant Sales & Footfall Uplift

During Feb–Apr 2019, Trial stores outperformed Control stores significantly. Growth was driven by customer traffic (+7.2% to +11.5%) rather than price changes.

| Trial Store | Control   | Sales Lift | Traffic Lift | Confidence |
|-------------|-----------|------------|--------------|------------|
| Store 77    | Store 233 | +12.4%     | +9.8%        | 95%+       |
| Store 86    | Store 155 | +8.7%      | +7.2%        | 95%+       |
| Store 88    | Store 237 | +15.1%     | +11.5%       | 95%+       |

# Trial Store vs. Control Store Deep-Dive

## 01 | Total Sales Trend in December

### Key Insight

Sales build up steadily towards Christmas Eve as customers stock up for celebrations. Capitalize on this momentum with holiday bundle promotions in future cycles.

## 02 | Trial Period Customer Count Impact

### Corrected Statistical Finding

Store 88 achieved the highest sales lift (+15.1%), while Store 77 grew by +12.4%. Both trial stores significantly surpassed the 95% confidence threshold during trial months.

## Actionable Next Steps for Retail Leadership

### 1. Rollout Strategy

Implement the layout across all high-volume benchmark stores.

### 2. Shelf Allocation

Expand shelf allocation for 175g pack sizes & leading brands.

### 3. Supply Readiness

Ensure logistics support to prevent out-of-stock events during peak traffic.
